B2B CRYPTO LENDING INFRASTRUCTURE

SCROLL

01 • PROBLEM

Credit unions are *locked out* of crypto lending.

140 million Americans trust their credit union over any bank. But when those members want to unlock liquidity from their Bitcoin or Ethereum holdings, they're forced to go to D2C lenders like Nexo or Ledn — or sell, triggering a taxable event.

Credit unions want to serve these members. The regulatory complexity is the barrier — not the appetite.

- 01 No compliant crypto lending infrastructure exists for NCUA-regulated institutions
- 02 D2C competitors (Nexo, Ledn, SALT) aren't B2B — they compete with CUs, not serve them
- 03 Younger members with crypto assets are migrating to fintech — CUs are losing them
- 04 No risk assessment model purpose-built for crypto collateral under NCUA guidelines exists
- 05 Custody, bank connectivity, and KYC/AML integration requires months of compliance work per institution

Compliance Infrastructure

Bank-grade financial data connectivity approved and live across 6 core products. KYC/AML and fraud infrastructure MSA fully executed — production-ready compliance infrastructure live. Annual billing secured, consortium anonymization in contract.

ERC-3643 On-Chain Identity

Clean-room implementation of three ERC-3643 compliance modules — jurisdiction gating, collateral LTV verification, and CU member identity attestation. Built on the T-REX standard. Deployed on Sepolia testnet.

PATENT PENDING

Privacy-Preserving Underwriting (FHE-DACS)

Member financial data is encrypted before the risk assessment process begins. Lending decisions are computed without exposing raw inputs at any step — ever. Patent-pending architecture purpose-built for NCUA-regulated institutions.

PATENT PENDING

07 · Yield

Staking Module

Members can stake supported digital assets directly through the platform — earning yield while maintaining collateral eligibility for crypto-backed loans. Adds a yield layer to the Ethereum product suite, deepening member engagement and creating an additional revenue stream for credit union partners. Coming Soon.

08 · Tax Intelligence

Tax-Position Score & Collateral Optimizer (TPSOE™)

The TPSOE engine scores the tax efficiency of every collateral position in a member's portfolio — ranking assets by embedded tax liability so the optimal pledge set is always selected. Members borrow smarter, not just more: no taxable event, no unnecessary capital gains exposure. The Collateral Optimizer computes UGLV and TAEV per asset, selects the lowest tax-cost collateral set that

09 · Member Intelligence

Member Crypto Insights

Real-time visibility into the digital assets your members already own — before they need a loan. Consent-based wallet connections, DACS eligibility scoring, and an opt-in loan pipeline that surfaces qualified borrowers before they apply. The first CU intelligence layer built for the digital asset era.

PATENT PENDING

The *largest untapped* lending opportunity in credit union history.

"Credit unions are sitting on the largest untapped lending opportunity in their history. Aetherum is the infrastructure layer that makes it accessible."

TAM · TOTAL ADDRESSABLE MARKET

\$150B+

Untapped Crypto Lending Gap

56M Americans hold crypto. Less than 1% can borrow against it through a regulated institution. That's a \$150B+ untapped lending gap — with no compliant path to liquidity today.

SAM · SERVICEABLE ADDRESSABLE MARKET

\$15–25B

NCUA-Regulated Credit Unions

4,800 NCUA-regulated credit unions. 140M members. An estimated 21M hold crypto today — with no compliant path to liquidity through their trusted financial institution.

SOM · SERVICEABLE OBTAINABLE MARKET

**\$1.2M → \$36M
ARR**

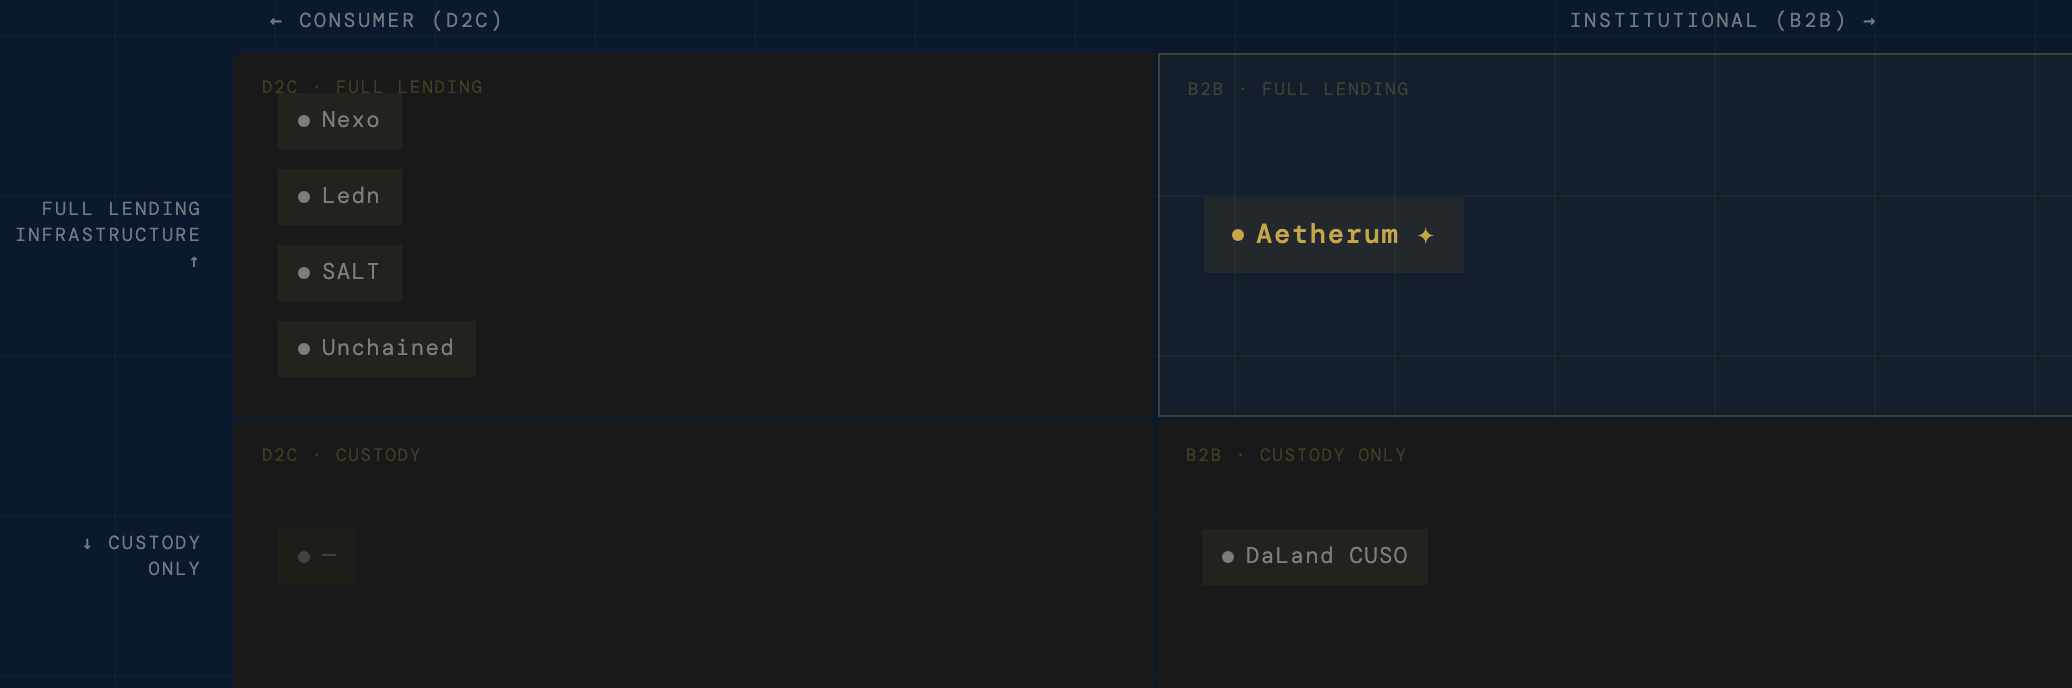

3-Year Ramp

Year 1: 10 CUs × 100 loans/mo = **\$1.2M ARR**

Year 2: 50 CUs × 150 loans/mo = **\$9M ARR**

Year 3: 150 CUs × 200 loans/mo = **\$36M ARR**

Built for institutions. *No one else is.*

"Every competitor is building faster pipes. Aetherum is building the first crypto lending platform purpose-built for regulated institutions — with the compliance infrastructure to match."

Most fintech shows you a dashboard. *Aetherum shows you the reasoning.*

DACS™ RISK GAUGE

Member sees their risk profile in real time
— not just a number.

SMART REVIEW™

Every loan comes with an explanation the
member can actually read.

The CU sees everything their
examiner wants to see.

DACS-LTV™	loan balance set directly on the AetherumCollateralLTVModule in real time.	PENDING
XRPL-COLLATERAL™	XLS-66 LoanBroker integration architecture for NCUA-regulated credit unions. Covers: DACS-gated LoanBroker provisioning, Broker-Initiated Dual-Signature Flow (BIDSF) for compliant LoanSet transaction authorization, First-Loss Capital management as a regulatory capital analog, GENIUS Act Freeze/Deep Freeze compliance controls mapping, and XLS-70 member credential integration with CIP recordkeeping timestamps. Live demo running on XRPL testnet.	PATENT PENDING
ECOSYSTEM ADVISOR	Steve Salzer, SVP at Velera — Chairs the Board of Ongoing Operations LLC and sits on the NACUSO Board Advisor to Aetherum. Regulatory Advocacy Committee and CUNA Payments Subcommittee.	
SMART REVIEW	Shipped — AI-powered underwriting guidance live in production, zero additional friction in the loan live in flow. Members receive a plain-language borrowing assessment automatically at the point of production decision.	
RIPPLE / XRPL	— Live integration running on XRPL testnet — LoanBrokerSet provisioning, dual-signature LoanSet flow (BIDSF), and First-Loss Capital health monitor all operational. XLS-66 LoanBrokerRipple BD relationship active — XLS-66 Design Partner designation in negotiation. RLUSD as native loan currency.	LIVE ON TESTNET
CIE™	Collateral Intelligence Engine — Real-time collateral surveillance pipeline live in production. Custody webhook → LTV computation → DACS score update → risk state transition → audit log. 5-minute price monitor scheduler watching all active positions. 3 database schemas. 6 REST endpoints. live Loan Officer Dashboard panel.	PATENT PENDING

Revenue is tied directly to loan volume — meaning we grow as our credit union partners grow. The SaaS license layer adds predictable recurring revenue at scale.

ARR TARGET

$$\text{\$1K/loan} \times 100 \text{ loans/mo} \times 10 \text{ CUs} = \text{\$1.2M ARR}$$

Tax Intelligence add-on layer creates additional recurring revenue per CU partner.

ERC-3643 module licensing creates a second revenue surface independent of loan volume.

originated. Primary revenue driver tied to volume.

collateral transactions processed through the platform.

10%

SaaS License

\$50K–\$150K/year for large credit unions. Predictable ARR layer at scale.

New

Tax Intelligence Module

\$10K–25K/year per credit union as a premium add-on. Tells members not just what they can borrow — but which assets to pledge and how much they save in taxes by borrowing instead of selling. No B2B competitor offers this to institutions.

New

ERC-3643 Compliance Layer

Per-attestation module

Built by operators.

Advised by the ecosystem.

John Bailey

FOUNDER & CEO

20+ years in technical recruiting with placements at Google, Spotify, and Goldman Sachs. Previously co-founded Thorium Data (Data Catalog). Building Aetherum full-time since early 2025, managing all product, BD, fundraising, and technical implementation.

Steve Salzer

BOARD ADVISOR · SVP, VELERA

SVP at Velera since 2017. Chairs the Board of Managers at Ongoing Operations LLC. Sits on the NACUSO Regulatory Advocacy Committee and CUNA Payments Subcommittee. JD, University of Chicago Law School.

Rahul Goel

ADVISOR · JP MORGAN / UBER

Cybersecurity and financial infrastructure expertise from senior roles at JP Morgan and Uber, including involvement with Meta's Novi digital wallet. Advises on platform security architecture and institutional trust.

Saiprasad Raut

ADVISOR · WORLDPAY / VANAR

Head of Payments Infrastructure at Vanar, formerly Worldpay. Deep payments and blockchain infrastructure expertise guiding Aetherum's settlement and custody architecture.

Closing a *\$1M Pre-Seed* Round.

We're in the final stretch of closing our pre-seed round. Proceeds go toward closing the first two credit union pilots, completing platform development, and bringing on a CTO.

Capital deploys us to first 3 credit union pilots — reducing market risk and proving the explanation layer at scale.
